

MILKA BEKELE

Senior SharePoint & Power Platform Developer

Modernizing enterprise collaboration and business process solutions
across federal and enterprise environments.

6+

YEARS OF
EXPERIENCE

Senior Power Platform and SharePoint consultant specializing in replacing legacy InfoPath and SharePoint Designer workflows with scalable Power Apps and Power Automate solutions.

Strong background in SharePoint Online administration, Microsoft 365 governance, security, and Power Platform ALM using Pipelines.

Known for delivering maintainable, performance-focused solutions and partnering with stakeholders to streamline operations and reduce technical debt.

// EXPERIENCE

Senior Technical SharePoint Specialist / Power Platform Consultant

ITC – USCIS (FOD) • Feb 2021 – Present

- Architect SharePoint Online solutions with modern site architecture & governance
- Build Power Apps (Canvas) & Power Automate workflows for complex business processes
- Implement Power Platform ALM with Pipelines & managed solutions
- Prepare datasets with Power BI & Power Query for federal team dashboards

SharePoint Developer

MetroStar Systems – Dept. of State (PRM)

Feb 2019 – Nov 2020

- Administered SharePoint 2016 and Office 365 environments
- Developed business forms using InfoPath & SharePoint Designer workflows
- Supported migration from SharePoint to Dynamics 365
- Configured permissions & security for departmental compliance

★ Recognized with two Certificates of Appreciation and an Attitude of Gratitude award

// PROJECT SHOWCASE

AUTOMATION

Power Platform Modernization

Led migration of legacy InfoPath forms and SharePoint Designer workflows to scalable Power Apps and Power Automate solutions across USCIS, improving automation and reducing technical debt.

ANALYTICS

Federal Dashboard & Reporting

Prepared datasets using Power BI and Power Query to build dashboards for federal teams, enabling data-driven decision-making and performance monitoring across departments.

AI & M365

AI-Driven Productivity Initiatives

Supported AI-driven productivity initiatives by designing automated workflows, integrating M365 tools, and guiding customers through governance, security, and adoption best practices.
